Gossamer Microdermabrasion

The Gossamer microdermabrasion system is small, quiet and has the power to treat the most demanding skin conditions. Whether you need a feather touch for sensitive skin, or a powerful exfoliation for thickened, sun damaged skin, the Gossamer can deliver a full spectrum of treatment strengths.

Microdermabrasion technology is suited for men and women of all ages and skin types. The treatment is painless and results are cumulative. Each treatment should deliver fresh, glowing skin, and a client looking forward to their next session with you.

No Crystal Spray, No Crystal Mess, No Clogs. The efficient hand piece design vacuums up crystal off the skin as you exfoliate, keeping the client free of loose crystal. You will not be breathing in loose crystal, or cleaning up a mess from sprayed crystal after each treatment. Dual controls allow independent adjustment of both crystal flow and treatment intensity.
