

100% Pure Hyaluronic Acid

This unique formulation of 100% pure Hyaluronic Acid features a proprietary Low Molecular Weight formulation. The serum has no fillers and the serum is not greasy on the skin.

Because standard formulations of Hyaluronic Acid are only available as a large molecule, they are more difficult product to penetrate into the skin. This unique LMW (Low Molecular Weight) formulation has the same hydrating, skin plumping and antioxidant qualities, but because of its smaller molecular size, it has superior product penetration through the skin.

Within minutes your skin feels a plumping and tightening not found in other hydrating products. Wrinkles ease and texture improves immediately as hydration plumps the skin. Hyaluronic Acid keeps collagen hydrated and healthy. Hyaluronic Acid can retain up to 1,000 times its weight in moisture to hydrate and smooth skin.

LMW Hyaluronic Acid helps restore dry, sensitive or sun damaged skin to a healthy condition. Skin elasticity returns as hydration supports collagen and fills interstitial cellular spaces. The strong antioxidant properties of the 100% Hyaluronic Acid make it a potent tool to use on dry, photo aged, sun burned or damaged skin.
